

Cold Forging Forum in Moscow

On 24th – 25th June the Cold Forging Forum 2010, held at the Holiday Inn Lesnaya, Moscow, Russia, brought together more than seventy experts in cold forging production from ten countries.

The conference considered modern methods and equipment for the production of fasteners and cold forged parts, for important Russian and CIS markets including automotive, aviation, railways and general engineering. A series of presentations were made to eighteen Russian companies. The idea for the forum was developed in Italy, where Sacma Group took a leading role in bringing it to realisation.

In addition to Sacma Limbiate and Ingramatic, participating companies included: Asmega, Aspe Snc di Pipitone, Caber Impianti, Carbo Dies, Cieffe Forni Industriali SpA, Corti Domenico Srl, Deca Srl, Gnutti Transfer SpA, Henkel, Kemno Sas, Rockford Manufacturing Group, Sirio Srl and VoestAlpine.

Presentations covered all the stages of fastener production from wire rod, through wire drawing, cold forging, thread rolling, secondary operations, tooling, materials transfer, coatings, inspection and packaging.
