

**LEWIS MACHINE**  
established 1911

We are in search of the oldest Lewis Straighten and Cut machine still in use. If you believe you have this machine we're very interested in hearing from you.

Rockford Manufacturing Group is proud to be a part of 100 years of American manufacturing excellence.

Since 1911, Lewis Machines have been built to provide decades of reliable service. RMG has continued this tradition with innovative improvements such as our patented "Clutchless" cutters, digital arbor and feed speed meters, and pneumatic feed roll pressure while maintaining the same robust, proven and long-serving design.
